PORTHOLES & HATCHES RANGE  
2010

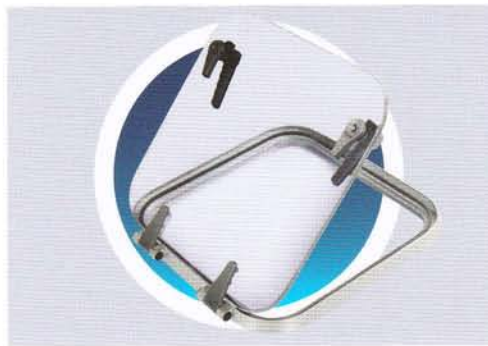

## DECK EQUIPMENT

Deck equipment consists of a number of functional articles, used for mooring or anchoring and for all other pieces of equipment that are located on deck. In addition to their functionality, a nice design and top-grade materials can be true eye-catchers, that radiate a bit of luxury of the boat.

CRAFTSMAN MARINE only uses such top-grade materials, which are highly resistant against the most awkward weather and sea conditions. Our high-gloss polished stainless steel anchor windlasses and bollards retain their splendour during many, many years. **In this section of our programme you will also find boat windows, portholes and escape and ventilation hatches.**

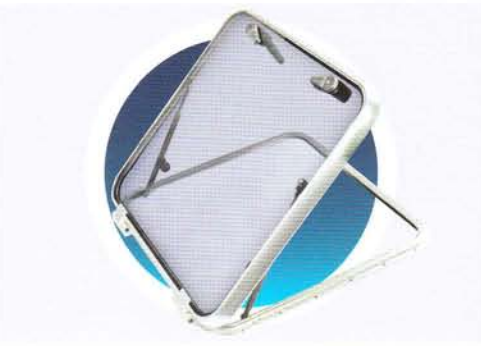

**All of these products are designed and extensively tested "to last" (durability!) and to radiate a whiff of luxury.**

Also this range of articles is subject to permanent expansion and growth. Our news letters and information on the website ([www.craftsmanmarine.com](http://www.craftsmanmarine.com)) will keep you posted about all new products and other developments.
